

FOSS Group, IIST

Indian Institute of Space Science and Technology, Thiruvananthapuram

Organizes a short talk titled, **The Internet and Network Security**

VENUE : C-106, D4 Building, IIST
DATE : Wednesday, February 22, 2017
TIME : 03.00 p.m.–04.00 p.m.
SPEAKER : *Anand Narayanan*
(8th Semester, B.Tech. AV)

Abstract

The Internet is something that we normally take for granted. This talk is meant to provide some insight into the technical sides of the origins and constructs of the internet, focusing on the vulnerabilities and security issues associated. There will be simple demonstrations to make evident the importance of safety and security in the usage of internet resources. The talk will also touch on the current computer networking buzzwords such as Sensor-Networks, Software Defined Networks, Internet of things etc. More than anything else, it is just a small session to gain a better insight into something that we always depend on—The Internet.
